

IRIS - User Guide 1: Navigation Tour

Powered by [guidde](#)

This user guide is an introduction to the IRIS demonstrator, developed as part of the UK government's National Digital Twin programme. It provides an overview of the application and a walkthrough of how to navigate it.

01 IRIS Overview And Purpose

IRIS is a digital tool designed to support data-driven decision-making for retrofitting domestic properties by identifying homes that could benefit from energy efficiency improvements. It enables stakeholders to assess housing stock based on energy performance data to help target funding schemes and policy interventions more effectively.

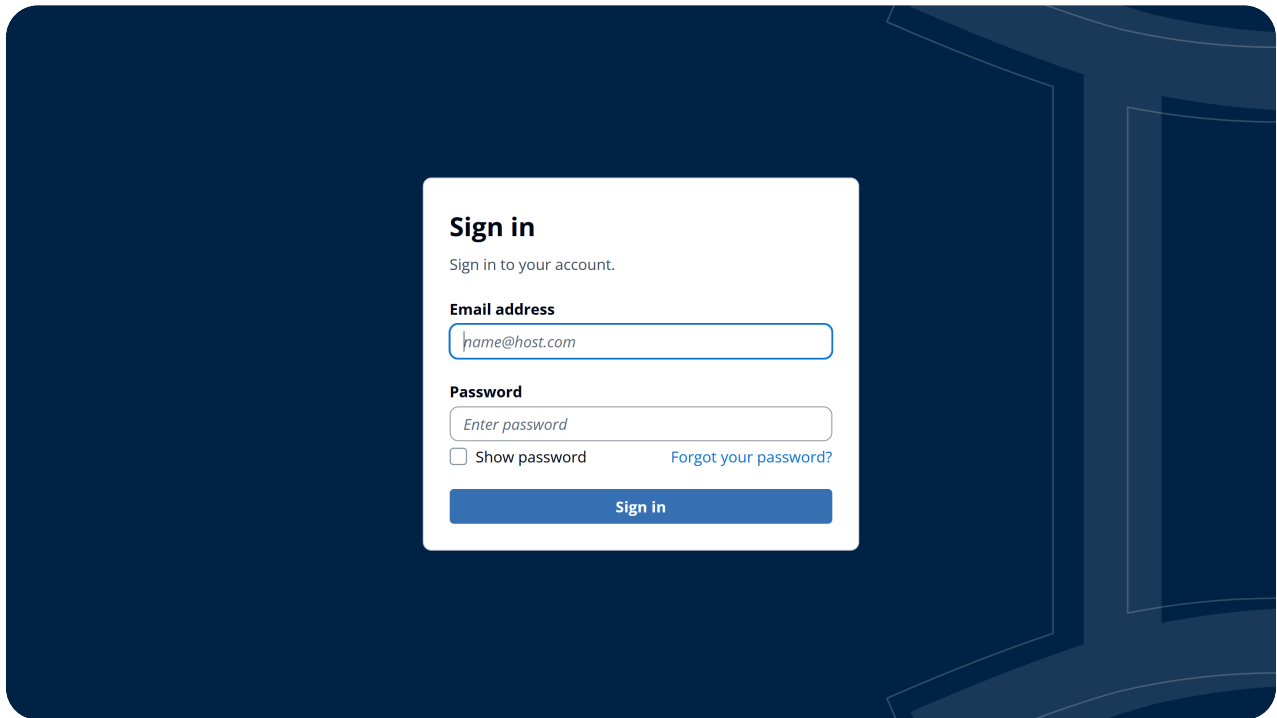

IRIS Demonstrator

User Guide 1: Navigation Tour

02 Logging In

To begin, log in with your NDTP credentials by entering your username and password.

Sign in

Sign in to your account.

Email address

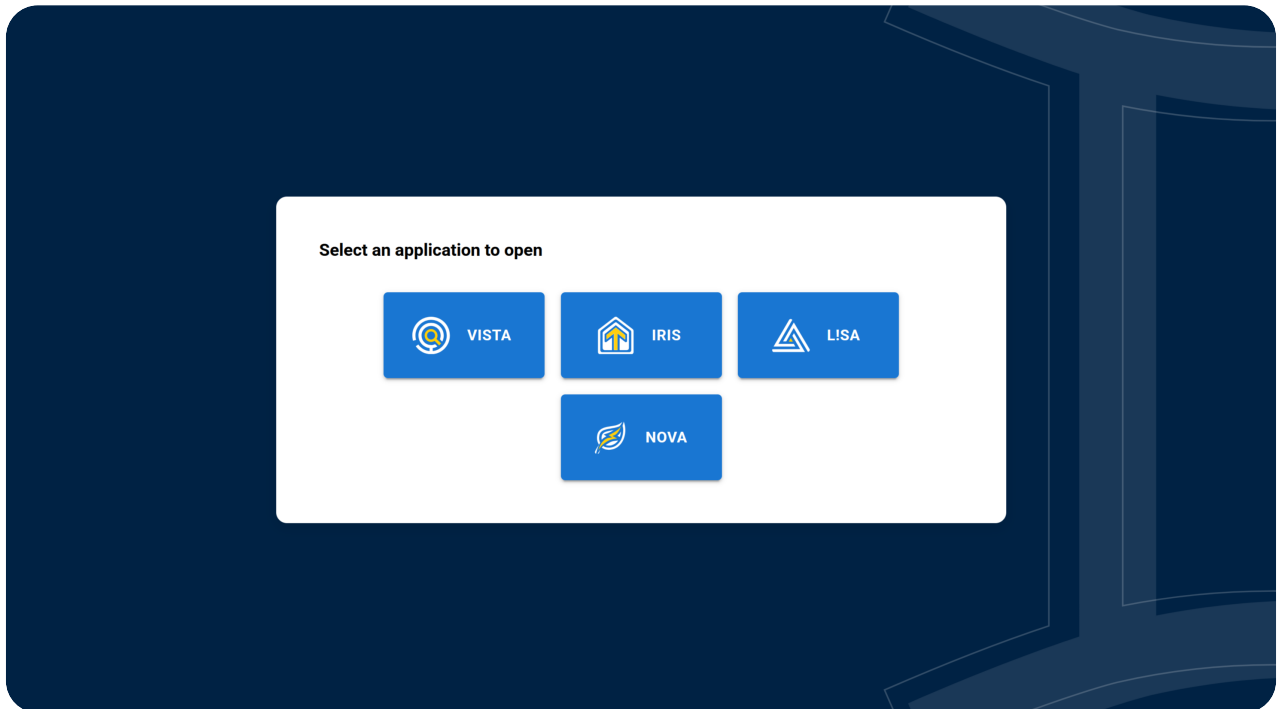

Password

☐ Show password [Forgot your password?](#)

Sign in

03 Opening IRIS

Then click on the IRIS icon to open the application.

04 Map Controls

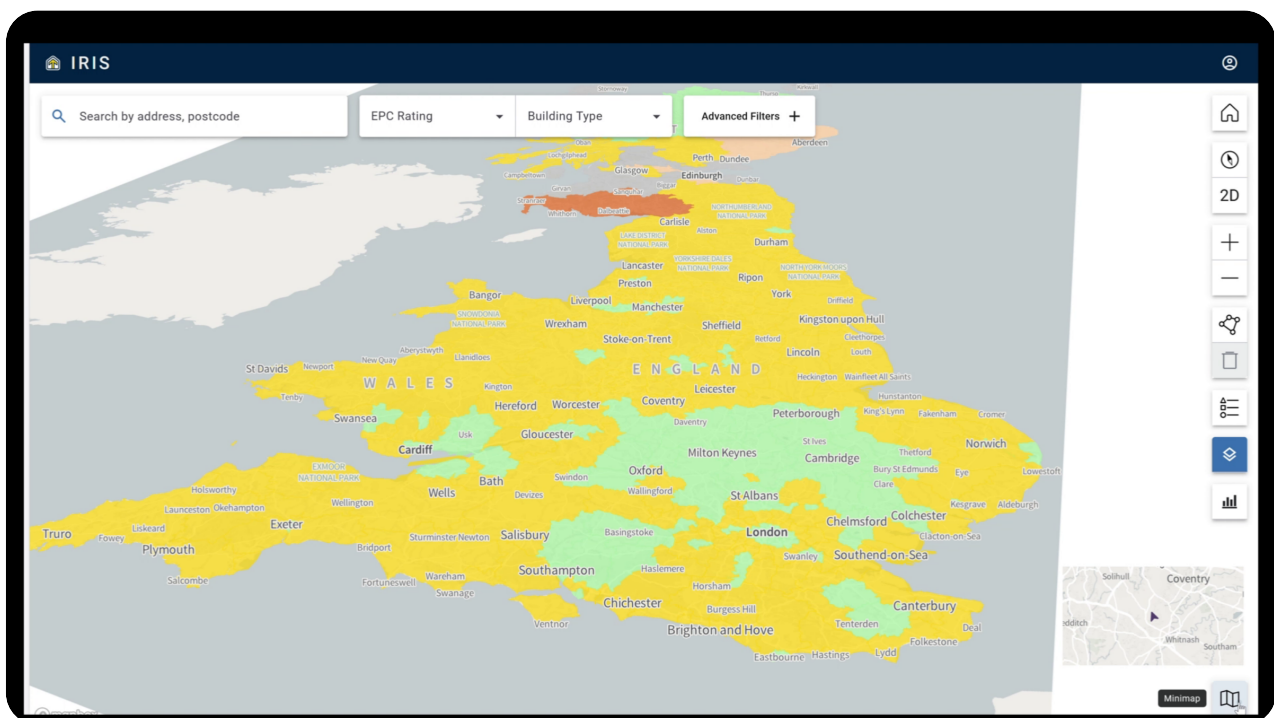

There are various map controls you can use to get to where you want. Zoom in and out using the scroll wheel or the zoom buttons on the right side of the screen. To rotate and change the viewing angle of the map, hold Ctrl while moving the mouse.

Switch between 3D and 2D viewing angles using the button on the right side of the screen.

The mini map at the bottom right gives a secondary sense of direction and position if you need it. If not, you can remove it from view using the minimap button in the bottom right of the screen.

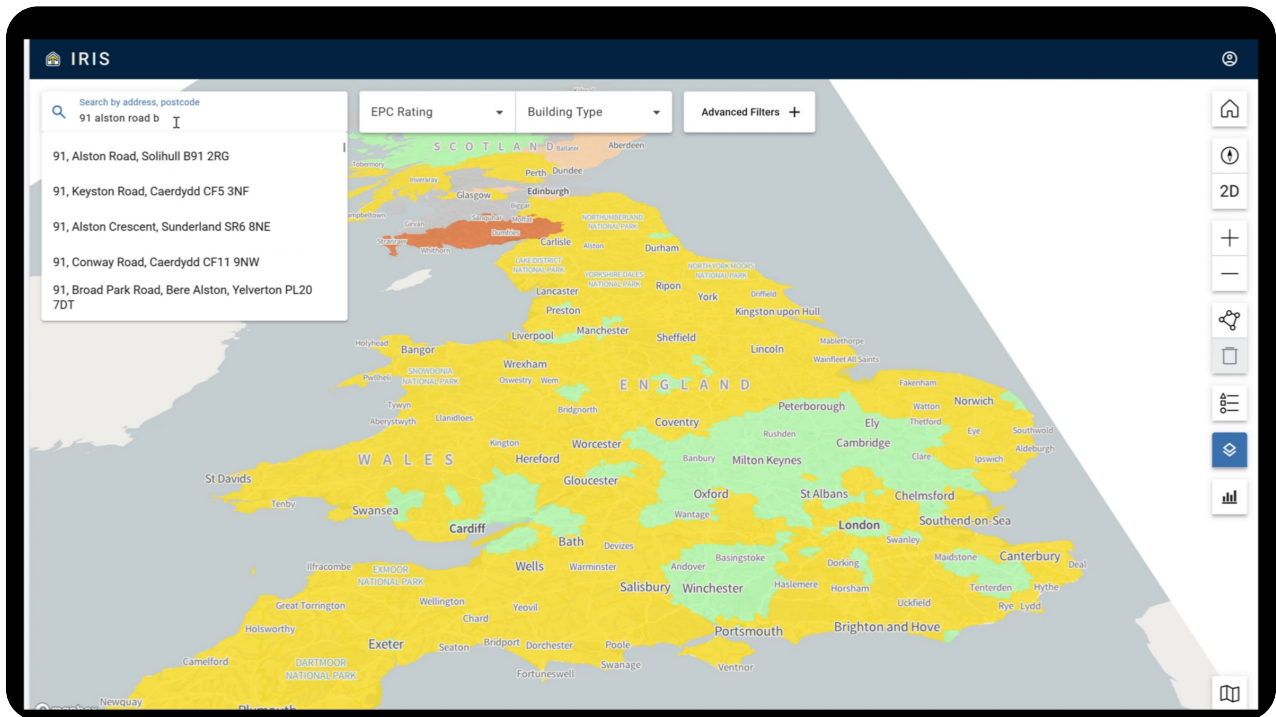

To reset the viewing angle back to north facing, press the compass button near the top right of the screen.

If you would like to return to the initial view when you first logged in, click on the home button at the top right of the screen to do a full reset of zoom, pitch and viewing angle.

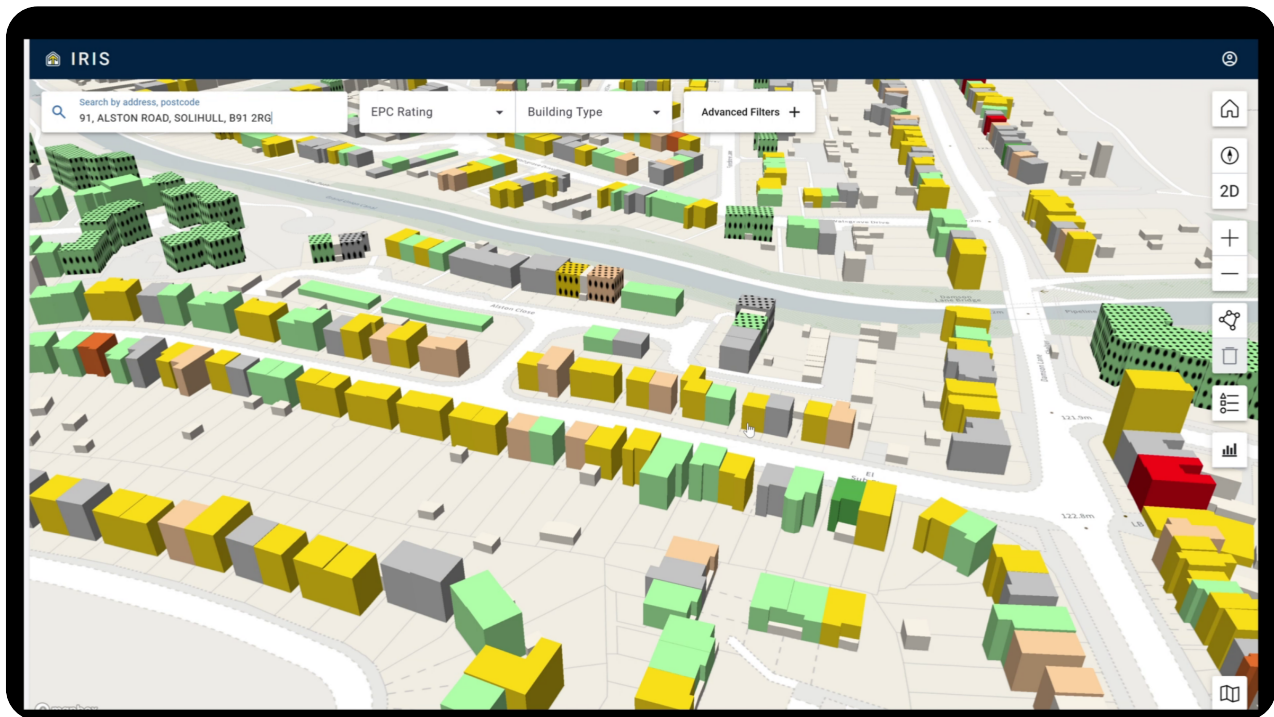

05 Using the Search Bar

A core feature of IRIS is the ability to focus in on particular dwellings using the search bar. To do this, enter an address in the search bar and select it from the drop-down menu.

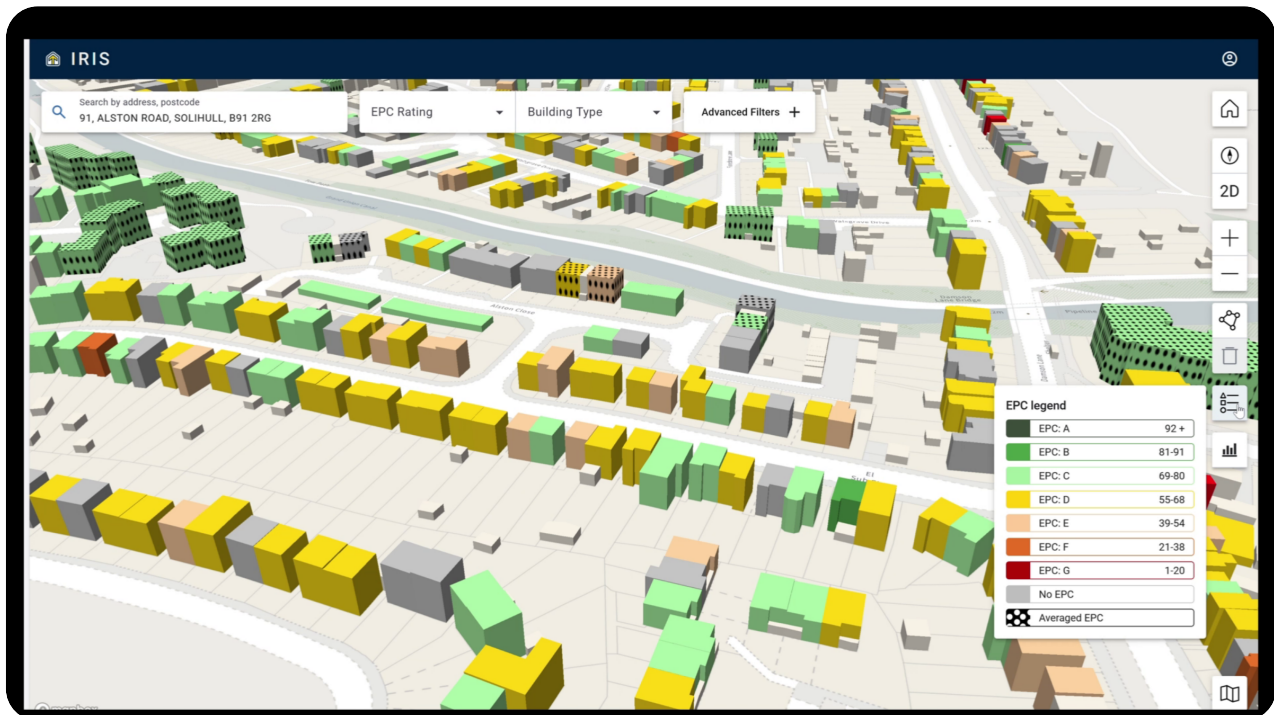

06 Viewing Detailed Building Information

You will automatically be taken to the address where you can view dwelling level data. This is covered in more detail in our guide for viewing detailed building information.

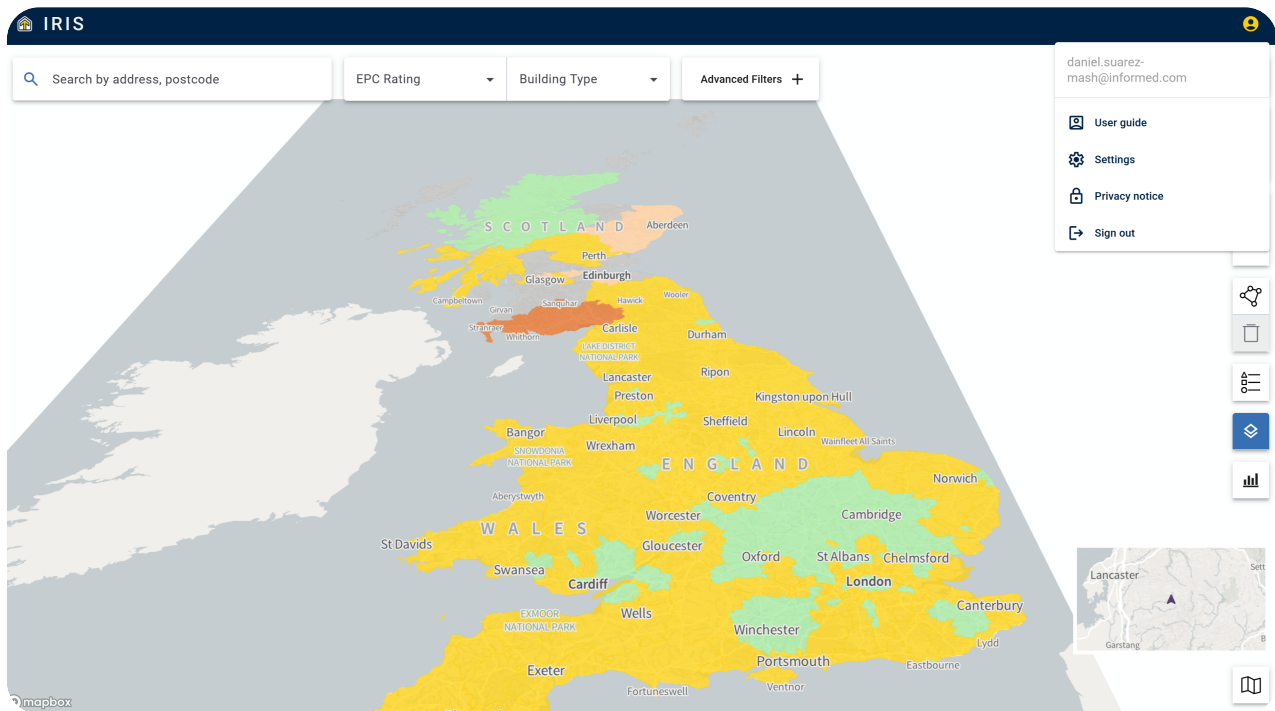

07 EPC Rating Legend

For clarity on what color relates to each EPC rating, open the legend using the button on the right hand side of the screen.

08 Viewing The Privacy Notice And Signing Out

To sign out of IRIS or view the privacy notice, select the profile icon in the top right corner.

That completes the introduction to IRIS. For further information about IRIS and the National Digital Twin Programme, visit the National Digital Twin Programme website.
